OPEN LEARNING FOR AN OPEN WORLD

The Open Polytechnic of New Zealand is a leader in flexible vocational learning, providing services internationally for:

- Students
- Education Partners
- Governments and Organisations

ABOUT THE OPEN POLYTECHNIC OF NEW ZEALAND

We are internationally recognised as a leader in the field of open and distance learning (ODL), and a past recipient of the Commonwealth of Learning's top award for institutional excellence in distance education.

We offer the security and certainty of a Government owned and accredited institution with more than 60 years experience at supporting students and organisations with vocational learning in their time and place.

The Open Polytechnic of New Zealand is New Zealand's major educator of part-time adult learners and people in the workforce. Our qualifications are accredited by the New Zealand Qualifications Authority, internationally recognised, and focus on delivering applied technical and Vocational Education and Training (VET) to suit employers and industry.

Our work in the field of e-learning has won international awards, including the global Mellon Award for open source e-learning projects and the Silver Award at the Learning Impact Awards hosted by the IMS Global Learning Consortium in the United States.

OPEN VOCATIONAL EDUCATION AND TRAINING (VET)

We are a leading VET provider. We remove the barriers of time, place and cost to deliver effective learning solutions. We have a strong track record in designing and delivering skills and competency based learning solutions within blended and networked learning environments. We also work closely with industry to deliver vocational training and accredited national standards and qualifications.

As demand for technical and vocational skills grows worldwide, our proven delivery of flexible, open and distance learning can extend learning opportunities to people of all backgrounds.

We work with international organisations and government agencies to help create flexible learning systems that can either stand alone or be integrated into existing training structures.

Our delivery model is underpinned by strong learning design, quality assurance and delivery systems. It provides access to a wide portfolio of qualifications and to custom-designed VET learning solutions. Our processes mean we can cost-effectively reach large numbers of learners across organisations, regions and countries.

FOR STUDENTS - COURSES AND QUALIFICATIONS THAT WORK

Delivery by distance means our students can gain New Zealand accredited vocational qualifications by studying in their own country. We can also help our students to take up further study at other education providers in New Zealand.

We specialise in flexible learning that is designed to help our students fit study around their life commitments. Wherever they are in the world our students are supported by our high quality learning resources and services.

Qualifications from the Open Polytechnic of New Zealand are approved by the New Zealand Qualifications Authority. Students gain work skills that can further their careers or continue to do further study in New Zealand.
